GoSky 20-60 x 80 Spotting Scope

GoSky 20-60x80 Spotting Scope

includes:

- Tripod,
- Carrying Bag
- Smartphone Adapter

The latest Waterproof Scope for Target Shooting, Hunting, Bird Watching, Wildlife & Scenery

The GoSky 20-60x80 has a variable 20x to 60x magnification and dynamic lens focusing system, making it easy to zoom in on your target. Its perfect for bird watching, target shooting, archery, hunting, the game reserve, observing wildlife, hiking, camping, outdoor activities and astronomical observation.

A fully multi-coated 80mm green film objective lens provides a field of view at 25.2m-14.6m @ 914 meters. The quality BAK4 Porro prism optics increases light transmission and make your view brighter, clearer and delivers crisp images.

A nitrogen filled waterproof and fog-proof design enables the scope to withstand the toughest environments. Its durable Framework and Rubber Armor provide a non-slip shock-proof grip and durable external lasting protection. The eyepiece shield is adjustable to cater for glasses.

A smartphone digiscoping adapter is included enabling you to take photos and videos of your target, bringing you closer to nature and enabling you to easily explore and share the world around you through smartphone.

The box includes a metal tabletop tripod for stable observation, eyepiece and lens protective covers, a cleaning cloth and a convenient carry case.

- 1 x Neck Strap.

Gosky EagleView ED 10x42 Binoculars

Gosky EagleView ED 10x42 Binoculars with Smartphone adapter

About this item

Premium ED (extra-low dispersion) glass binoculars: The Ed glass really helps with minimizing glare and ghost images, Reduces chromatic aberration and offers a sharper, clearer and more accurate color reproduction.

Optimum magnification: 10x42 binoculars are best for bird watching during long viewing sessions. Many experienced bird watchers prefer them. This magnification is also good for other universal outdoor applications like stargazing, climbing, hunting and indoor applications like watching large stage play, vocal concert, a football game, etc.

Superior optics: with a wide field of view, advanced fully multi-coated glass lenses, dielectric coating, smart Phase correction BaK4 Prism and ED glass, you can enjoy breathtaking clarity and brightness

The Gosky 10X42 compact roof prism binocular, equipped with FMC(fully multi-coated) green film lens and clear prism, 10X power and solid construction, is a good gadget which enable you to observe target in distant world with more true-to-life details.

1)COMPACT ROOF PRISM 10X42 BINOCULAR -- 10X power magnification and 326ft/1000yds large field of view, specially designed for outdoor activities such as climbing, hiking, driving, watching wildlife and scenery. This power also can be used for watching large stage play, vocal concert, a football game, etc

2)QUALITY OPTICS -- 42mm Fully multi-layer coatings green film objective lens and 18mm blue film eyepiece garentee the key parts of an optical device, make your view brighter, clearer and deliver crisp images.

3)Durable Framework and Rubber Armor - Its tight fitting protection makes it usable to withstand the toughest weather conditions. The shock-absorbing rubber armor for maximum protection.

4) Argon purged better waterproofing and thermal stability: argon purging provides waterproof, fog proof protection in any weather, and any environment. Rubber armored body strengthen its durability

5) With Carrying Case, Eyepiece and Lens Protection Covers, Cleaning Cloth and Binocular Neck Strap.

6) Comes with a Gosky quick alignment smartphone adapter.

With a soft carrying case, neck strap belt, Flip down lens caps and cleaning cloth, this power binocular can be carried and stored safely and conveniently

What's in the box

- 1 x Binocular 10x42
- 1 x Smartphone adapter
- 1 x Carrying Case
- 1 x Neck Strap
- 1 x Cleaning Cloth
- 2 x Lens Cover
- 1 x User Manual

Monocular - 12x55 ED Glass

Gosky 12x55 High Definition Monocular Telescope

2020 Waterproof Monocular - BAK4 Prism for Wildlife Bird Watching Hunting Camping Travel Scenery

About this item

12x55 high power magnification - have the best view in your outdoor adventures. To see 12x closer with a clear and bright image with the generous, light-gathering 55mm objective wide lens. Perfect for hiking, hunting, climbing, bird watching, ball games, concerts, watching wildlife and scenery.

High powered monocular promises brighter, crystal clear views during all your outdoor adventures.

Ideal for outdoor enthusiasts and wilderness explorers, a handheld and must-have for bird watching, wildlife, hunting, hiking, mountaineering, camping, surveillance and traveling.

The long eye-relief with the twist-up eye cup makes this high-end monocular set stand out among competition!

Argon purging provides waterproof, fog proof, dustproof and shockproof protection in any weather, and any environment. Rubber armored body strengthen its durability.

GIT DT40 12x30 Binocular with Camera

With these binoculars, you not only get to see the bigger picture at the moment, but you can capture crisp HD video and 8MP still images, so you can treasure those memories for years to come, and share them with friends and family, too.

Features:

- Full HD 1080P (@30fps) for videos, Max up to 2.5K UHD
- 2592x1944 (JPG) for photos, Max up to 48MP
- 2.4" IPS LCD display (320x240 Pixel)
- Digital zoom up to 8x magnification
- Low light amplification (better view at low light (0.01 lux))
- Supports Micro SD card up to max. 128GB
- Built in 1000mAh rechargeable battery (up to 8h recording)
- 7h of 1080p (@30fps) video recordings equal \approx 32GB
- Optical glass with 12x magnification
- Distance covered: from 96 to 1000 meters

Technical specifications:

- 1/2,8" CMOS Sensor 48MP
- Lens: f=25mm, F/NO 3.0, FOV=17,5°, low light amplification (0.01 lux)
- Video resolution: 1920x1080/30fps, 1280x720/60fps, 1280x720/30fps
- Photo resolution: 48M/20M/18M/16M/12M/8M/5M/3M
- Video length: 1, 3, 5 or 10 min. settable
- File format: JPG/MP4
- Working time: Video: 7-8h; Photo: Depending on the resolution
- MicroSD** card (up to 128GB, Class10) [**not included]
- Video recording: 1080p: 5min. \approx ca. 250MB; ca. 7h \approx 32GB
- Photo recording: 5M: 1x photo \approx 2MB; ca. 15000 \approx 32GB
- Working temperature: -7°C up to $+60^{\circ}\text{C}$

Package contents:

- 1x 12x32 Binoculars with HD Digital Camera
- 1x Mini USB cable • 1x Neck strap
- 1x Cloth
- 1x User manual
- 1x Color Box

Night Vision NV400 Binoculars

NV400B 7x31 Infrared Digital Night Vision Binocular with integrated Camera.

Handheld Binoculars, Still Image and Video Recording, Infrared Camera, Widescreen, 32G Memory Card

Ever been to the bush and wanted to be able to see in to the dark but not been able to without a torch?? Put an end to this nuisance and get back to enjoying the sights with a pair of NV400-B Digital Night Vision Binoculars.

Our NV400-B provides an impressive suite of options designed to enhance your viewing pleasure, and it all begins with a large screen that displays a crystal clear view that you'll be able to watch without having to press the eyepiece against your face. The display can be viewed and enjoyed under the cloak of night as well as bright, sunny skies, as digital technology allows the NV400-B Digital Night Vision Binoculars to function safely in both conditions, unlike older generations of devices that can suffer from permanent damage as a result of the sun's UV rays.

Enjoy sights from afar with up to 7x magnification (with digital zoom), and nighttime viewing is enhanced up to 400 meters with the help of the infrared illuminator. Capture all of your favorite imagery and sounds to the included 32GB TF card, then easily transfer them to your PC or even stream directly to your TV or computer monitor via video output.

The NV400-B Digital Night Vision Binoculars are ultra-light and come housed in a rugged exterior for protection, and are capable of providing up to 10 hours of use on 8 standard AA batteries. Great for outdoor recreational enthusiasts and those who work outside.

Features:

- Up to 7x magnification
- Day and Night use
- Infrared illuminator allows viewing in the dark up to 400mtr
- Display images and videos on TV
- Easy transfer of files to PC/Laptop
- Tripod mountable(1 tripod Jack)

Product Specifications:

Model: NV400-B

Optical Performance

Magnification (with digital zoom)	3.5x ~ 7x
Digital Zoom	2x
Objective Lens	31mm
Angle Of View	9°
Exit Pupil Distance	30mm
F# for Objective lens	1.2
Viewing Range in daytime	3mtr ~ ∞
Viewing Range in Darkness	Up to 400mtr

Imager

High sensitivity Sensor	CMOS
Size	1/3"
Resolution	640x480
Displayer	Resolution of Screen 320x240
Lighting System	Luminance 3W Infrared LED
IR Wavelength	850nm

Power

Working Voltage	4.5v – 6.0v
Power Supply	8x AA Batteries
Battery Life	10 hours (with IR Off)
Signal Processing	Output USB
AV Supporting	NTSC/PAL
Storage	TF Card 4GB – 32GB

Packaging

Dimensions	210mm x 145mm x 65mm
Net Weight	750g (without battery)
Includes:	Binocular, USB Cable, AV Cable, TF Card, Carrying Case, Manual

In the box

- 1 x NV400-B Night Vision Binocular with 32GB card
- 1 x USB cable
- 1 x AV cable
- 1 x Manual
- 1 x Soft Carry Case

15 meters in full darkness

Night Vision DT18 Monocular

Night Vision DT18 Monocular with integrated Camera.

GIT DT18 Night Vision Monocular with Intergrated Camera

GIT's DT18 combines a night vision monocular & digital camera system for viewing and capturing photos or videos from a distance. Easily record 2K Quad HD videos and capture hi-res photos in 48 MP resolution. It features a 4x magnification and 8x digital zoom for a total 32x total magnification. The 850nm infrared LED illuminates your view in the dark to capture videos & photos up to 300m away. A 1.54-inch LCD monitor is embedded into the viewfinder eyepiece. With an integrated tripod mount, it easily mounts onto a tripod for hands-free operation.

FEATURES

Digital Camera Features

- 2.5K QHD Video Resolution
- 48 MP Photo Resolution
- 1.54" LCD Monitor Eyepiece
- 850nm Infrared 3W LED Illuminator
- 8x Digital Zoom
- Time-Lapse Recording•Burst Shot Capture
- Micro SD Expandable to 128GB Monocular Features
- 4x Magnification
- 20mm Objective Lens F/1.4 Telephoto
- 10.4° / 165m. @914m. FOV
- 0.5 Ocular Adjustable Range
- BK7 ED Multi-Coated AR Lens
- 40mm Exit Pupil
- Observation Distance: 2 ~ 300m.
- IR Distance: 2 ~ 200m.

Included in the Package

- Monocular
- USB Cable
- Carrying Case
- Wrist Strap
- Cleaning Cloth
- User Manual
- 128GB SD Card

Night Vision DT29 Monocular

Night Vision DT29 Binocular with integrated Camera.

GIT DT29 Infrared Digital Night Vision Binoculars

This digital night device is designed for both day and night use. It has photo, video and playback functions.

4X Optical Magnification 8X Digital Zoom
A Full Colored Night Vision 3.0" Display Screen for Playback and viewing. Applications include leisure, Speleology, Fishing, Hunting, Security, Search and rescue and Wildlife viewing.

This digital night device is designed for both day and night use. It has photo, video and playback functions. The 4X Optical Magnification and 8X digital zoom allow you to view objects clearly. With a special infrared illuminator, the user can see distant target in full darkness from 150m to 300m. It is perfect for camping, hiking, caving, animal observation and other nighttime activities.

Features:

1. Powerful night vision binoculars, 4x Optical Zoom, 8x Digital zoom, long range viewing up to 250-300 meters.
2. Taking daytime color image or video and black/white image or video at night
3. Built-in 3.0" IPS screen with setting menu in 11 languages, easy to use
4. It is suitable for hunting and scouting game, surveillance, camping, night fishing and boating, wildlife observation and rescue.
5. Battery life: 1*18650 rechargeable lithium battery 2500mAh (included)
6. Handy and safe — Can be mounted on a tripod
7. Silicone Backlit Buttons design

Resolution

2.5K UHD/1920x1080@30FPS/1280*720@30FPS
Still image size 40M, 30M, 25M, 20M, 10M, 8M, 5M, 3M (JPG)
Aperture F 1.2 f=25mm
Digital zoom 4x

Display: Inner screen 3.0" (640*480) high-definition IPS
Observation distance: Full darkness 250-300M
Low light or daytime observation distance 0.5 meters to infinity
Infrared light - 850nm
Power supply - 1*18650 rechargeable lithium battery 2500mAh
USB interface - TYPE-C 2.0
Storage medium - 64GB SD Card

Included In the Box

- 1 x DT29 Night Vision Binocular
- 1 x Case
- 1 x Strap
- 1 x USB to Micro SD Adapter
- 1 x USB Cable
- 1 x Lens Cloth
- 1 x 64GB SD Card

DWARF II - Smart AI Telescope

DWARF II Classic - AI powered Smart Telescope driven by a smartphone app

The easy route to Astrophotography for beginners and advanced users

Are you an amateur astronomer, bird watcher, wildlife photographer, or just a photography enthusiast that needs to capture things you can't get close enough to like a ball game? Well, DWARF II is exactly what you need.

The Dwarf II fills a gap in the Astrophotography world. Most people who want to image the stars as a hobby can become intimidated by expensive gear, complicated setups, and knowledge of complicated processing software. The Dwarf II breaks down all three of these barriers.

Versatile enough Take Shots of DSO, Birds and Animals
DWARF II is a compact smart telescope with dual cameras and AI power. You can take shots of deep sky objects, Planets, Galaxies and Nebulas as well as watch and record videos of birds and animals.

Easy to Control with Your Mobile Device

Connect your smartphone/tablet with DWARF II via WiFi, then you can wirelessly control the DWARF II through DWARFLAB's App (available in Android & iOS) and take pictures or videos.

Dual Camera System

DWARF II has two cameras, a wide-angle camera, and a telephoto camera. Through the wide-angle camera, you can take pictures/videos as a normal camera, or preview the field of view. Find the target in the middle of the wide-angle view, then the telephoto camera aims at your target. The telephoto image is always at a fixed place (near the center) of the wide-angle image.

Auto Star Tracking & Stacking for Astrophotography

Due to Earth's rotation, the stars move slowly through the sky. DWARF II can automatically track the stars. It can rotate around the altitude and azimuth along the movement of stars. DWARF II uses a field-rotation-correction algorithm to avoid the field rotation. Then you can use DWARF II to track deep-sky objects with long exposure time. Use the built in stacking capability to view to ""develop"" your target nebula in real-time. Use the built in catalogue to locate your deep sky target.

Automatic registration after multiple exposures

DWARF II stacks the images into a bright and clear image. It helps you to record deep-sky objects easily. Compact, Portable, Powerful Weighing in at 1.5 kg (3.3 lbs) you can take DWARF II anywhere, in its custom-padded bag or in a backpack

SarBlue Mak60 Telescope

Sarblue Maksutov-Cassegrain Telescope for Astronomy Enthusiasts

Mak60 Telescope, 60mm Aperture 750mm Focal Length, with Phone Mount Tripod, for observing the Moon, Planets and Stars

The SarBlue Maksutov-Cassegrain telescope offers astronomy enthusiasts a quality beginner scope in a small package with quality optics at an affordable price. Use it for Astronomy as well as a Spotting Scope

Good Optics

A Powerful Telescope for Viewing Planets: Good optics is what makes this telescope shine. The Mak-Cass design corrects visual defects like chromatic aberration and coma. Fully Multi Coated high-precision optical components ensure crystal-clear high-contrast views. Great for viewing craters on the moon, Saturn's rings or Jupiter's moons.

Educational Discovery Panel

Discover the Wonder of Optics: The telescope has the unique feature comprising a removable discovery panel. It reveals the fascinating internal construction of the Maksutov-Cassegrain optical system and helps you understand how it works. It provides a great educational kit for astronomy beginners. Remember not to touch the mirror.

Terrestrial and Celestial Applications

Versatility Meets Portability: Maksutov-Cassegrain is a favorite for both terrestrial and celestial use. You can also enjoy daytime viewing of subjects like birds and scenery. It's not only more powerful than a equivalent refractor, but also more compact and lightweight. The folded light path folds its 750mm focal length in its short 210mm tube, making it particularly portable for travel.

Accessories:

Included is a superior quality 20mm eyepiece which provides 37.5X magnification. A universal phone mount is included to capture the moment, along with a tabletop tripod for stable viewing (You can also mount it on a larger tripod. The tube has a universal 1/4 inch screw hole).

Satisfaction:

With an attractive appearance and great viewing power, this Mak telescope is sure to impress as a gift for your loved ones. Setup requires no-tools. It's easy to use for any astronomy beginners.

Included is a superior quality 20mm eyepiece which provides 37.5X magnification. A universal phone mount is included to capture the moment, along with a tabletop tripod for stable viewing (You can also mount it on a larger tripod. The tube has a universal 1/4 inch screw hole).

Satisfaction:

With an attractive appearance and great viewing power, this Mak telescope is sure to impress as a gift for your loved ones. Setup requires no-tools. It's easy to use for any astronomy beginners.

Capture the Moment

with included phone adapter

Great for viewing the moon and planets

Crystal Sharp Views

with Minimized Aberrations

- Maksutov-Cassegrain design
- High-precision optics
- Fully multi-coated

SarBlue Mak70 Telescope

Sarblue Maksutov-Cassegrain Telescope for Astronomy Enthusiasts with a Full Height Mounts

70mm Aperture, 1000mm Focal Length, with Finderscope, Phone Adapter, 10 and 20mm eyepieces

The mak telescope stands out from other telescopes by providing sharp and crystal clear views with almost no chromatic aberration. You can enjoy viewing both distant celestial objects including the moon, Saturn, Jupiter, and vivid terrestrial targets in nature.

This Mak 70 telescope is an upgraded version of Maksutov Planet Mate Mak 60 Telescope and with the finderscope, aiming and tracking your target is a breeze.

Included 10 and 20mm eyepiece renders 100x and 50x power. The telescope is small but powerful for its size, having 1000mm focal length in a small 230mm tube. You can use other 1.25" eyepiece to change magnification.

The telescope features an included universal phone mount which helps you easily capture the moment and share with your loved ones.

A design of simplicity, power and ingenuity

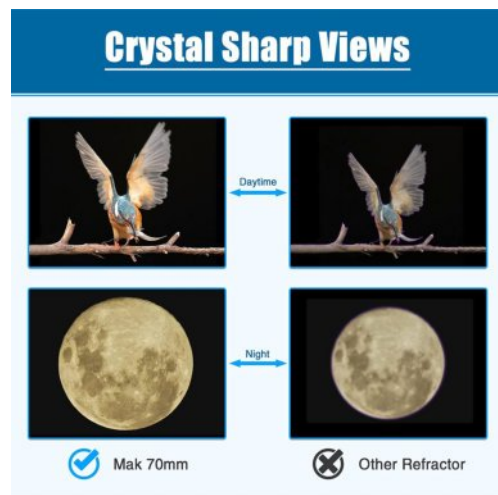

The Maksutov telescope is named after Dmitri Maksutov, a Soviet/Russian optician and astronomer who invented this telescope design in 1941. Though not as widely known as the refractor or Newtonian reflector, the Maksutov-Cassegrain offers superb optical performance. The design corrects the known optical problems such as coma (found in reflector telescopes) while also correcting chromatic aberration (found in refractors). The result is high-contrast detailed views of both terrestrial or celestial targets. In a extremely compact tube, the mak70 offers great viewing capacity as a beginner telescope. You can see more than just the moon! In ideal conditions, it can even help you explore Saturn, Jupiter's moons and more.

What's in the box

- 1 x Telescope with Tube cover
- 1 x Erect Image Diagonal
- 1 x 20mm Eyepiece (50X Magnification)
- 1 x 10mm Eyepiece (100X Magnification)
- 1 x Full Size Tripod
- 1 x Phone Adaptor
- 1 x Instruction Manual
- 1 x Finderscope

70mm Larger Aperture

Universal Cell Phone Quick Adapter Mount

It fits almost all Smartphones on the Market, enabling you to use your smartphone camera to record images from most eyepieces on optical equipment.

Get Your Mobile Phone camera connected to your eyepiece and easily record images on equipment ranging from microscopes to telescopes. Explore the nature of the world easily through your screen.

Compatible with microscopes, telescopes, binoculars, monoculars, spotting scopes. It can be adapted to fit eyepiece diameters from 28mm-45mm. Please make sure that the dimension of the device is in this range

The adapter fits almost all brands of smartphones on the market with or without a case from small to large such as all iPhone series, Samsung Note, Sony and many other brands. Smartphones with widths ranging from 54mm-95mm can be connected to the adaptor for use with multiple types of eyepieces on various equipment.

Capturing and Sharing.

Get your mobile phone connected to your telescope easily. Take images or videos of the view and share them to your friends and families

Quick Alignment Version and Super easy to use.

Align the camera and optics in a few seconds. The centre of the phone camera and the optics can automatically be aligned

The device is made of soft material to protect your eyepiece from three directions and a screw locks your mobile phone firmly and stably in position.

What's in the box

1 x Smartphone adapter

Gosky Universal Telescope Phone Adapter

Compatible with Spotting Scopes, Binoculars, Monoculars, Microscopes

Fit Almost All Brands of Smartphones (Big Type) from width 54mm-95mm

About this item

Updated phone holders. Fit almost all brands of smartphones on the market with or without a case from small to large such as all iPhone series, Samsung Note, Sony and many other brands.

Capturing and Sharing.

Easily get your mobile phone connecting with a telescope, microscope, spotting scope or binoculars. Take images or videos of the view and share them to your friends and families

Quick Alignment Version and Super easy to use.

Align the camera and optics in few seconds. The centre of phone camera and the optics can automatically be aligned

Soft material to protect your phone and a screw locks mobile phone firmly and stably

What's in the box

1 x Smartphone Adapter

Car / Vehicle Window Mount Tripod

Adjustable Vehicle Car Window Mount - Heavy duty clamp support with 1/4" screw thread for use on vehicle windows.

Two-way pan head for convenient adjustment and panning. The handle twists to tighten and loosen the pivot joints.

Rubber on the surface to connect your window and on the surface to your camera or scope. The unit is made up of a solid metal composite/plastic construction.

Full 360-degree rotation function for the perfect viewing angle. Perfect for game viewing, covert surveillance, safaris, scope photography and much more.

What's in the box

1 x Adjustable vehicle/car window mounted tripod

Telescope Accessories

Solomark 1.25-Inch Telescope Eyepiece and Filter Set

Telescope Accessory Kit Includes 5 x Plossl Eyepiece Set, 7 x Filter Set, 2X Barlow Lens Brand

A complete starter assortment of useful 1.25 inch accessories to get the most out of your telescope

Five superior grade Plossl eyepieces, 6mm/8mm/12.5mm/20mm/40mm Plossl Eyepiece, all eyepieces are fully multi-coated for maximum contrast and resolution

The kit includes 7 great filters for any telescope, a Polarizing Filter #3, a Moon & Skyglow Filter, and 5 planetary eyepiece Filters: No.56 Green, No.12 Yellow, No.23A Red, No.21 Orange and No.82A Blue. A 2x, 1.25-inch Barlow lens doubles the magnifying power of your eyepiece by doubling its effective focal length, giving you a total of ten power combinations.

It is a good gift for everyone who loves astronomy: The Aluminum Carrying Case is sturdy and well-built and holds all of the included items in the die-cut foam interior.

Bhatinov Masks

The Bahtinov mask is a device used to focus small astronomical telescopes accurately.

Although masks have long been used as focusing aids, the distinctive pattern was invented by Russian amateur astrophotographer Pavel Bahtinov.

The Bahtinov or focusing mask is a brilliant aid to get perfect focus. When the telescope is pointed toward a bright star, the mask generates the typical pattern that makes the focusing procedure easy. Adjust the focus of your telescope till you will see a symmetrical pattern.

Masks now feature 3 holes which can be attached with 3 screws to prevent the mask from falling off the front of the telescope.

It will take less than 1 minute to achieve perfect focus with your new mask and will mean you spend more time imaging photons rather than focusing on them

Light weight so you won't upset the balance on your scope

SOLOMARK Baader Solar Filter for Front of Telescope

The Baader Solar Filter is for telescopes with a dew tube front end diameter of 145mm-175mm.

A must-have, white light filter for safely observing the sun and sunspots without damaging your eyes. With this filter the Sun will appear to be a neutral, eye-pleasing white color. See sunspots, eclipses, and planetary transits of the Sun safely with your telescope and this filter

Made with high-quality, streak-free and blister-free Baader Astro Solar Safety Film
Optical density: 5.0 Aperture of the telescope

CAUTION: Never look at the Sun, either directly or through a telescope, without a professionally made protective solar filter installed that completely covers the front of the instrument, or permanent eye damage could result

Telescope Accessories

SOLOMARK Universal Dovetail Base for Finder Scope

Attach a dovetail base to your telescope to mount a finderscope
Compatible with a finder scope, Laser Pointer bracket or reflex sight bracket on telescopes, great for adding a second or third aiming device to your telescope.
Made of high strength Aluminum with Anodizing Aluminium Process. The base is made of die-cast metal and features two large thumbscrew locks. Includes two M5 screws.
Ideal for custom installation of any finder scope, fits most bracket designs from Celestron, Orion, Sky-watcher, Vixen, etc.
Compatible with finder scope, Laser Pointer bracket on telescopes.

T2 Ring Adapter with Metal 1.25" adapter for Canon, Nikon or Sony

Compatible with DSLR and SLR Cameras with EF Mounts
This useful accessory allows you to attach your Camera to the standard 1.25 inch eyepiece of a Telescope
1.25 Inch Camera Photography Telescope Eyepiece Holder Adapter 31.7mm-1.25" to T T2 / 1.25 Inch M42 DSLR/SLR Prime Adapter for Telescope
CNC Metal Construction-
Made of machined, anodized aluminum

T2 Ring Adapter with Metal 2" adapter for Canon, Nikon or Sony

Compatible options for Nikon, Canon and Sony DSLR and SLR Cameras
2 Inch Camera Photography Telescope Eyepiece Holder Adapter
31.7mm-2" to T T2 / 2 Inch M42 DSLR/SLR Prime Adapter for Telescopes
CNC Metal Construction
Made of machined, anodized aluminum

Solomark 2" Eyepiece Extension Tube (40mm long) with M48 Thread Adapter

1. Made of high-quality aluminum and anodized black, durable for long time usage.
2. Suitable for a 2-inch telescope focusing device, eyepiece, or accessory.
3. Equipped with locking finger screws for insertion of astronomical fittings.
4. The brass compression screw is used for 2inch eyepiece and astronomical photography filters,
5. Easy to use and portable, convenient to carry and store.

Solomark Telescope Adapter T/T2 Male Thread 42mm to Male 48mm

Objective Lens Diameter 42 Millimeters to 48mm low profile
It is a fully metal durable adapter.
Male screw thread to the camera lens: 42mm
Male screw thread to filter: 48mm
Made of anodized Aluminium - Telescope Digiscoping Adapter
